Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's argument that Reed reference does not meet the claim limitation of a plug having the same cross-section as that of the rail is weak as the claim language requires that "the at least one connection plug having a cross-sectional profile that is substantially identical to a cross-sectional profile of the running rail". It was pointed out to applicant that any welded junction of two I-shaped cross-section beam rails in a frog casting for example would meet the claim limitation..
